

CDE Survey

Survey to Assess Impacts of Coronavirus (COVID-19) on California Work Opportunity and Responsibility to Kids (CalWORKs) Stage 1, 2, 3, the California Alternative Payment (AP) Program, and the California Migrant Alternative Payment Program (CMAP)

This survey is being jointly administered by the CDE and the California Department of Social Services (CDSS) to collect key information needed for the COVID-19 response.

This survey contains the same questions asked in the last survey. In addition to identifying information about your agency or department, the survey asks two key questions:

1. What percentage of children receiving a voucher from your agency or department moved from one provider to a secondary provider due to the closure of their primary provider?
 1. Periods this data will be collected
 - i. March 16 to March 31
 - ii. The month of April
 2. What percentage of children receiving a voucher from your agency or department were on a variable schedule? (only asked to CDE contractors)
 1. Periods this data will be collected for:
 - i. The month of March
 - ii. The month of April

We are asking agencies and departments to resubmit information for March now that more complete information is available.

Alternative Payment contractors who administer CalWORKs Stage 1 on behalf of their County Welfare Department must provide CalWORKs Stage 1 data in addition to data on their CDE contracted programs.

Contractors operating in multiple counties should only submit one survey response that includes all counties served.
