As Amended: 2/3/2021

SUMMARY
Research shows that access to high-quality early learning opportunities improves children’s social-emotional development, school readiness, and long-term academic achievement. However, many families lack access to high-quality pre-K programs, and too many California children enter kindergarten unprepared for school and never catch up.

AB 22 will extend universal access to full-day transitional kindergarten (TK) programs to all four-year-olds statewide at no cost to families, while also implementing TK quality improvements to address the social-emotional and early academic development of California’s youngest learners.

Universal Transitional Kindergarten is a crucial piece of a larger package of 2021 Early Childhood Education (ECE) legislation that will strengthen California’s ECE system to better meet the needs of working families, support childcare providers, and most importantly ensure that every child in California is given a strong start to a successful future.

BACKGROUND
Ten years ago, the Legislature approved the “Kindergarten Readiness Act,” which established TK to serve and educate four-year-olds within the public K-12 system. However, only 25% of four-year-olds (those with fall birthdays) are eligible to enroll in TK. The remaining 75% of four-year-olds miss out on this opportunity for an additional year of high-quality public education.

A study by the American Institute of Research found that TK significantly improves kindergarten readiness, putting children ahead of their non-TK peers by up to six months in some academic skills. TK gives students an advantage in literacy, language, math, and problem solving skills compared to non-TK students – even those with other preschool experiences.

The benefits of TK are most significant for disadvantaged students: low-income children and English learners show the greatest learning improvements at the end of TK. These findings demonstrate that high-quality TK can be a powerful tool for narrowing opportunity and achievement gaps, and setting all of California’s students on a path to success.

With historic rates of declining enrollment across the state, increasing Proposition 98 funding, and unprecedented levels of one-time education funding, California has a unique opportunity in 2021 to lay the groundwork for a more robust ECE system. AB 22 builds upon and strengthens California’s existing TK infrastructure by phasing in full-day, universal TK for all four-year-olds while also implementing quality improvements including lower adult-to-student ratios and developmentally appropriate learning expectations.

This bill gives families an additional option to ensure their children enter kindergarten with the maturity, confidence, and skills they need to excel.

ECE PACKAGE
• Universal Transitional Kindergarten (AB 22, Asm. McCarty)
• California Early Learning and Care Program (SB 50, Senator Limón)
• Rate Reform (SB 246, Senator Leyva)
• Preschool Expulsion Ban (Asm Rubio, legislation to follow)
• Preschool and Childcare Family Fees (AB 92, Asm. Reyes)
• Mandatory Kindergarten (Senator Rubio, SB 70)
• Early Learning and Care Dashboard (Asm Robert Rivas, AB 568)
